

Quick Reference Card • CPRP • Micro Futures

"Trade the boundaries. Respect the structure. Control the risk."

INSTRUMENTS

- **MES** — Micro S&P; 500 (Primary)
 - **MNQ** — Micro Nasdaq-100
 - **MYM** — Micro Dow
- Micros only. No other contracts.

CHART PAIRS

- 5-min + 1-min
 - 15-min + 5-min
 - 30-min + 15-min
- Higher TF = structure | Lower TF = entry

STATIC TREND CHART

- **1-Hour** (primary) in separate window
 - 4-Hour acceptable alternative
- Context only — does not generate entries

CORE EDGE — RANGE / CHANNEL REVERSION

Identify a **confirmed Support/Resistance range or channel** (sideways or trending). Fade the boundaries: **Buy Support • Sell Resistance**. Continue until the structure breaks. Direction of the channel does not matter — the Protocol is neutral.

STRUCTURE REQUIREMENTS

- Minimum two clear touches (or near-touches) at both upper and lower boundaries
- Visible rejection / respect of the levels on the higher timeframe
- Structure must be unambiguous — if unclear, stand aside
- Once confirmed: Upper boundary = Resistance (sell zone) | Lower boundary = Support (buy zone)

ENTRY CONFIRMATIONS (ALL REQUIRED)

#	Confirmation	✓
1	Clear confirmed S/R range or channel on higher TF	■
2	Price at/near boundary (Support = long Resistance = short)	■
3	Price action rejection on lower TF (wick, engulfing, turn)	■
4	Volume supports rejection or shows absorption	■
5	RSI favorable (not opposing extreme / divergence preferred)	■
6	Hard stop fits inside −\$50 to −\$100 risk limit	■
7	No recent structure break (or 30-min pause completed)	■

HARD RISK RULE (NON-NEGOTIABLE) → Max loss per trade: −\$50 to −\$100 | Exit immediately at limit | No averaging down

EXITS & STRUCTURE BREAK

PROFIT SIDE

- Primary target = opposite boundary
- Partial allowed at mid-range
- Trail only after meaningful progress
- Scale out on strong opposite touch

STRUCTURE BREAK

- Decisive close beyond boundary
- Flatten related positions immediately
- **Pause 30 minutes minimum**
- Wait for new clear structure to form

OPERATIONAL DISCIPLINE

- Trade only liquid sessions for the chosen micro • Prefer MES unless MNQ/MYM clearly superior • Journal every trade (setup, checklist, result, lesson) • Weekly review vs these rules • Never increase risk to recover losses • No discretionary overrides — the Protocol is complete as written
